HVAC Metrics

100 customers/jobs:

45 maintenance × $250 average

50 repair × say $700 average

5 replacements × $10,000

1. Profile the buyer

- [x] ~~Describe the target market (who they are , what defines their daily life)~~
- [x] ~~List their current state pains and dream state desires~~
- [x] ~~Acquire Specific customer language~~

Customer Language

▼ Good Reviews

- He's highly competent, thorough, tidy and professional,
- Cleaning the humidifier was more challenging today as it had leaked, the filter was stuck because of calcium build-up
- From the first consultation, Max immediately understood the goal of a century-old fireplace; he offered thoughtful design suggestions; and he created a fireplace that perfectly fit and enhanced the space available.
- Brian from the beginning explained everything to us with the such kindness
- They were professional and also explained to us how to operate the unit. Again,
- The technician was engaging, respectful, dedicated and educational.
- Brian and his team responded immediately and had a new furnace installed within two business days.
- Once again, the service was outstanding - the crew diagnosed and fixed the issue within two hours.

▼ Bad Reviews

I have since had to spend over $2K to fix issues with the improper installation including an air intake vent that had to be reported to Enbridge as a safety breach.

I was ghosted by Brian after mentioning the issues. Originally, though the price was fair, it also increased unexpectedly when I had to pay an additional $400 for a part they did not foresee needing.

. There are other companies to use, and the price apparently is what it is for a reason.

We purchased and installed an air conditioning unit from Mr. Heat Mechanical 5 years ago. We kept getting ice build-up and after our regular maintenance company diagnosed it, they suggested that this shouldn't happen after only 5 years, and it is likely due to improper cleaning of the pipes prior to installation

We had to have the install repaired at our own additional expense and now have a working unit and a usable room.

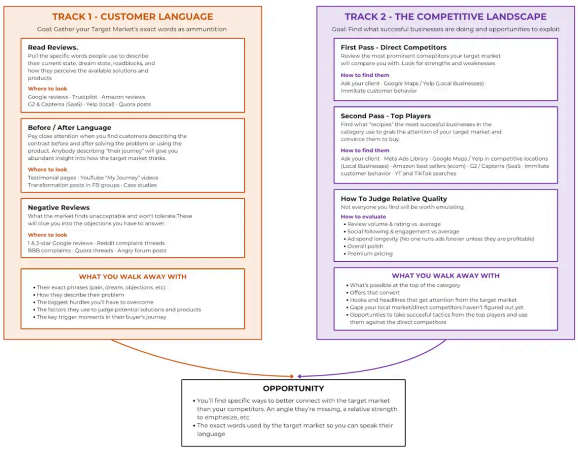

- target market (in one breath)
  - Middle Age home owners that already has an established life, Bought a house.
  - Middle class income, looking for the best well rounded option

- Current State: (Put reviews in callout tab)
  - Pain

> 😠 the filter was stuck because of calcium build-up, and there was calcium build-up externally as well!
> pulling out post construction and renovations material that should have been removed from past cleaning.
> We have to clear significant dust every day.
> Earlier this year, in the dead of winter, our furnace failed
>
> - Problematic furnace bugging them for a while

- Dream State: I
  - Desire

> 😍 It has completely transformed the room, adding warmth, comfort, and a beautiful focal point (as can be seen in the photograph).
>
> - Don't have to have the worry at the back of their head anymore.
> - Their family can get through winter and summer with peace
> - Someone does the job CLEAN and no more worries
> - Doesnt have to worry about HVAC for YEARS, just routine annual check up

2. Market Research

- [ ] Fill in roadblocks (what's stopped them), solutions (how they evaluate options), products (how they pick a provider)
- [ ] Assess awareness (unaware → product-aware) and attention (active search vs passive scroll). Pick your platform
- [ ] Break down 2 to 3 top players and competitors. What they say, what works, what's missing
- [ ] Name the gap: what the market needs to hear that nobody is saying

- Roadblock (what's stopping them)
  - Nothing is broken and the cost is not worth the fix yet
  - Pain is not enough to pull trigger
  - Significant financial spend, waiting for the right offer

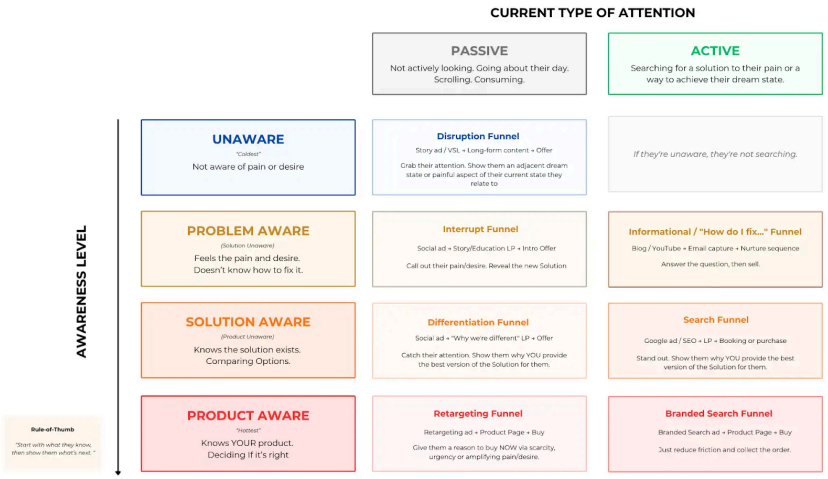

- All possible solution
  - [They DIY] Try to fix it them selves, possible safety concern, future problems, low financial cost
  - [Ask THE GUY] Ask him if he knows anything can fix their broken AC. Low financial cost but high chance of it not getting fixed
  - [Do nothing] Wait another year until things get absolutely un acceptable
  - [Call a contractor to see what's up] Call someone for a free assessment. and see if they can fix it themselves
  - [Pay Us] Decide they cannot fix and the money is worth their pain relieve

- What have they already tried? (Previous solutions, why those didn't stick)
  - DIY - changing their furnace settings, Search youtube
  -

- The Product (how they pick a provider

- What they look for in a company
  - Good reviews, Trustworthy Gets their job done
  - fast response time
  - Listens to them and not ripping them off
  - No future issues, the money spend can last years without issues (upsell annual maintanance)
- What makes them distrust the company
  - Slow response time
  - Unprofessional human beings. (everything how you dress, how you show up, how you call to followup
  - bad reviews

Awareness Level:

Attention (where are they now? physically and phycologically)

Semi Active - maybe just telling people about their problem [complain mode]

Physical location Job - home - TV - dinner - repeat.

Platform (Meta ads)

TPA (Top player analysis)

list out at least 5 top players form local and from big cities

- what goods are they doing that's working
- what are they missing

3. CIA Interview

🚨
- [ ] Write 3 Phase 1 questions (timeline)
- [ ] 2 Phase 2 questions (comparison). Note what each one should reveal
- [ ] Identify who you'd interview (buyers + non-buyers) and how you'd find them

[Phase 1 Question] → [what it reveals]

how they were thinking when they were making the decision

use your GAP to test if its the real GAP

[Phase 2 Comparison] → [What it reveals]

Which of these two would you have clicked or stayed longer

4. Engineering

🚨 what does the customer need to do
what do they need to think

Main Action I want the customer to make:

Call us to see what's happening

THRESHOLDS: Desire 6/10 → 8/10 | Certainty 4/10 → 8/10 | Trust 4/10 → 7/10

The GAP

Stress free consultant approach, talk about feelings that hits them.

the feeling of not getting it done properly

the feeling of desperately trying to find someone in winter.

Mental Chain

[Scrolling after day of work] → [Short curiosity hook]

[That's interesting I probably have the same issue (unsure)]

-[Pain amplify (you dont want you're kids to be freezing at winter and desperately trying to find someone do you]

[So what do you guys offer differently that we can trust you]

-[Stress free interview approach]

[That might sound like something we can maybe try out] desire7 Certainty 4 Trust 7

-Testimonials and previous customer feedback and past work

CTA Make sure you and your family stay warm this winter
